

Welcome!

Thank you for purchasing the Wisp. Don't forget to register your device at: www.wispvapor.com/registermywisp

1 IMPORTANT: Before you begin, please:

-  Always begin your session with an authorized, unused Wisp pod.
-  Keep the Wisp away from water. Water is not required for use.
-  Do not put your hand inside the open base.

2 Getting to know your Wisp

-  Wisp Base & Powercord
-  Wisp Bottle (With pre-installed sleeve & mouthpiece)
-  Extra Vapor Bottle Sleeves (x2)
-  Extra Mouthpieces
-  Wisp Pod (Sold separately. Sample pack may be included.)

SETUP

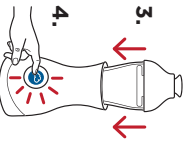

1. Unpack box and remove all parts from protective packaging.
2. Register your Wisp online at: www.wispvapor.com/register
3. Plug unit into fully grounded outlet.
4. You are ready to Wisp!

We highly recommend our quick setup video at www.wispvapor.com/wispsetup

3 Using your Wisp

HOW TO USE YOUR WISP

Your Wisp is operated with a single touchscreen. No other buttons or switches are required. You will need authorized Wisp pods to use your Wisp.

-  1. Peel Wisp pod lid, using pull tab to remove completely.
-  2. Insert Wisp pod, open side up, into bottom of vapor bottle until it catches evenly.
-  3. Lower vapor bottle into base, pod end first, pressing firmly to puncture the pod.
-  4. Press the cloud icon to begin.
-  5. Wait for your Wisp to complete the vaporization process. It is likely that a small amount of vapor may escape from the vapor bottle or the Wisp device during the vaporization process.
Important: Pod heated during use: Wait until device says "READY" before removing vapor bottle from base.

WAIT! BEFORE YOU WISP... When you are ready to enjoy your Wisp vapor, we recommend using small, sip-like inhalers... we call them "wispsti!"

VAPORIZING PROCESS

-  1. Startup Screen
-  2. Enter Passcode (Optional)
-  3. Begin Heating
-  4. Pod Heating to Temperature

-  5. Vaporizing
-  6. Pod Cooling
-  7. Vapor is "READY"

3 Using your Wisp (cont.)

6. To inhale, remove vapor bottle from the base and press your lips to the mouthpiece, pushing gently to open the one-way valve.
7. Inhale slowly with one short draw. When you release pressure on the mouthpiece, the one-way valve will close. Repeat as desired.
8. When finished, remove pod by pressing the side eject button. Deflate any remaining vapor from sleeve.
9. Recycle Wisp pod.

4 Touchscreen

OPTIONAL PERSONAL SETTINGS

- | | | | |
|---|---|---|---|
|  |  |  |  |
